

Call for Papers
10th European Manufacturing Test Conference (EMTC)

Tuesday 7 October

Stuttgart, Germany

In conjunction with SEMICON Europa 2008

Continuing in its tradition of providing a practical focus on real solutions in the production test environment, Semiconductor Equipment and Materials International (SEMI) invites European Manufacturing Test professionals to submit abstracts for the European Manufacturing Test Conference which will be held on Tuesday 7 October in conjunction with SEMICON Europa 7-9 October 2008 in Stuttgart, Germany.

The EMTC 2008 will focus on papers that describe practical and successful solutions to current production testing challenges. Areas of interest include:

- Adaptive test
- How to realize DUT board hardware and test programs for test fixtures containing configurable logic (FPGA)
- Low cost power supply techniques
- Contactless testing implementations
- Wafer probing
- Package test
- Quality in test, stress tests and PPM reduction techniques
- SoC Testing
- KGD and SiP test
- Design for production test
- Test Data Management

Instructions to submit a paper proposal - Submit the following information in an e-mail

- Specify which area your presentation falls in to from the above list
- Presentation title
- Abstract of 200-400 words (descriptive paragraph identifying issue addressed and solution)
- Short biography of the author
- Author contact details (Job title, company, address, telephone/e-mail)
- Contact person details i.e. Personal Assistant (Job title, company, address, telephone/e-mail)
- Indicate in subject box of e-mail: EMTC Call for papers

Please submit ALL the above information in one e-mail by 30 May 2008 to europrograms@semi.org

Your presentation will not be included in the review process unless the information is complete.

Evaluation criteria include significance, usefulness for the manufacturing world and clarity and accuracy as a paper. Abstracts will be peer-reviewed. We encourage operational case studies and application related presentations, i.e. on joint projects between users and suppliers - (please reference cases). Papers are to be non-commercial and focus on the technical/economical merits of a process rather than the individual

company's product benefits.

Selected presenters will be notified by 6 July 2008.

Program Committee: Davide Appello, STMicroelectronics; Rene Segers, NXP; Ron Leckie, Infrastructure Advisors; Klaus Lutz, Advantest; Ulrich Schoettmer, Verigy; Peter Muhmenthaler, Infineon Technologies; Klaus-Detlef Paesch, AMD; Michael Goldbach, LTX; Martin Stadler, Teradyne; Robert Whyte, Credence
