24TH FAB MANAGEMENT FORUM

11 NOV 2020 | ICM MUNICH

KEYNOTES:

Andreas Schleicher  
Director for the Directorate of Education and Skills

Dr. Andreas Hölscher  
Senior Vice President Corporate Product Development

Prof. Gregor Hopf  
Professor for Digital Transformation

Ruediger Dorn  
Industry Lead High Tech & Semiconductor Industry

Key discussion points:

- The newest and most unique tools and processes in the industry: Equipment control, automation and sensor solutions, smart tools and digitization
- Managing legacy factories and legacy tools in fab operations: Modifications, tool upgrades and automation solutions to meet the needs of aging equipment
- Planning on times of economic and climate change: How can fab operators better prepare for disruptions and ensure production continuity
- Skills in the workforce and people in processes: How to optimize people and skills in semiconductor fab manufacturing environments, from attracting young professional and anticipating future needs to transferring skills for leaving experts
- The future of smart manufacturing: Moving from 4.0 to 5.0 technology and how to get there
