Your Guide to SEMICON Europa 2026

Essential Information for Students

As you prepare to attend SEMICON Europa, this guide helps you navigate the event and make the most of your visit. Whether you're here to connect with employers, explore breakthrough technologies, or learn where the industry is heading, here are the key sessions and experiences designed for students.

November 10 (Tuesday)

CxO Summit | 10:00 am | Executive Forum, Hall C1
Top executives share how innovation and collaboration drive Europe's semiconductor growth. A great chance to hear real insights from industry leaders shaping the region's technology future.

SEMICON Europa × TUM Venture Labs Hackathon Launch | 10:00 am | NextSEMI ARENA, Hall B0
Discover how interdisciplinary teams turn semiconductor challenges into new business ideas, with guidance from industry mentors. A great chance to see innovation in action and explore how technology, teamwork and entrepreneurship come together.

Start-Up Pitches| 1:15 pm | NextSEMI ARENA, Hall B0
Meet emerging startups and discover their ideas for the future of semiconductors. A great chance to hear directly from entrepreneurs, explore new technologies and get inspired by potential career paths in the startup world.

Prompt or Perish? How AI is Revolutionising Skills, Hiring & Workplace Ethics | 3:40 pm | TechARENA, Hall B0
What skills will you need as AI changes how semiconductor companies hire and work? Explore how education and training can prepare you for a career in the industry and how employers can make hiring and career progression fairer.

November 11 (Wednesday)

Market Trend Forum| 10:00 am | NextSEMI ARENA, Hall B0
Industry experts explore the market trends, opportunities and challenges shaping Europe's semiconductor industry. A great chance to understand where the industry is heading and what these changes could mean for your future career.

November 12 (Thursday)

SEMI University Onsite Training: "Introduction to Semiconductors"| 9:00 am | ICM Munich, Room 12 a+b
Learn the fundamentals of semiconductor technology through practical examples and interactive exercises. This full-day course includes time for questions and runs until 4:00 pm.

CHERI Alliance: CHERITech'26 | 1:00 pm | NextSEMI ARENA, Hall B0
Discover how CHERI cybersecurity technology is helping build more secure processors, software and digital systems. A great chance to explore real-world applications and hear from the people turning research into products designed with security at their core.

November 13 (Friday)

Innovation Showcase | 10:00 am | Executive Forum, Hall C1
Explore innovations in microelectronics and semiconductors through short, pre-recorded presentations, pitches and product announcements. A great chance to discover new technologies and see how companies are bringing their ideas to life.

Throughout the Event

EU Projects Pavilion | Hall B0, Booth B0.950
Visit the EU Projects Pavilion at SEMICON Europa (Hall B0, booth B0.950) to explore how EU-funded initiatives are shaping the future of microelectronics. Explore projects advancing semiconductor innovation, skills development, sustainability and international collaboration, bringing together industry, academia and research organizations to strengthen Europe's semiconductor ecosystem.
